

# International Newspaper Color Quality Club 2014 – 2016

**Presenting the best newspaper printers in the world**

and / or

### Digital with KBA RotaJET

- Variable data
- Direct mail
- Book
- Industrial printing
- On-demand printing
- Microzoning
- Personalization
- New business models
- One to one marketing

### Offset with KBA Cortina

- High volume printing
- Short makereadies
- High quality
- New advertising formats
- High performance
- Customised automation
- Compact design
- Commercial products
- Target orientated newspaper production

## Whichever road you choose KBA can help you

There is a shift in newspaper production. Print runs are getting smaller and target groups more specific. The bar is being raised in terms of quality, productivity, flexibility and economy. New ad formats, new business models and added value concepts are in demand. As the market leader KBA offers future-orientated solutions tailored to individual needs – whether waterless offset or high-performance digital printing. Any questions? Give us a call.

# WAN-IFRA welcomes the new Color Quality Club members

**The International Newspaper Color Quality Club is the only worldwide printing quality competition for newspapers. Its goal is to improve the quality of reproduction and printing in production, while also increasing competitiveness as well as training and motivating all personnel. The competition has been held every two years since 1994. Newspapers that participate with success are awarded membership for a two-year period in the exclusive club of top-quality titles. Multiple winners and participants in the WAN-IFRA certification project also have the prospect of being awarded membership of the Star Club.**

The announcement of the new members of the Color Quality Club was awaited with great anticipation. The list of winners includes many “old friends” who have already secured their place in the Star Club, alongside a series of new names who join the ranks of the winners for the first time.

Of course, achieving the stated objective – membership in the Color Quality Club as a recognised testimony to excellence in colour newspaper printing – is the top priority. But there are also many other

reasons why participating in the competition is worthwhile.

## Verifiable top quality

For Aaron Phipps, Operations Manager at Advance Central Services Michigan, this year’s only Color Quality Club member from the USA, it was important to have his company’s high standard of printing quality certified by an independent organisation. He sees the successful participation also “as confirmation for our employees that they are doing a good job. In addition, the competition offers a suitable means for keeping quality at a high level. It also helps us to demonstrate to our print customers that we are capable of supplying a consistently high-quality product,” he says.

## Reward for a major effort

André Ferreira, Process Engineering Coordinator at Infoglobo in Brazil, wanted to have an international benchmark for comparison in order to assess his company’s perception of printing quality. Ferreira’s team carried out an in-depth analysis of the process: “After we failed to reach the objective in 2012, we drew up a comprehensive action plan on the basis of the 2012 evaluation reports. We had three major challenges: control dot gain, fully understand the evaluation processes, and introduce an internal procedure along the lines of that of WAN-IFRA, i.e. applying the same conditions and with comparable measured values.”

Ample use was made of the possibilities of the online self-check: “We used it constantly – a very practical tool,” says Ferreira. “To be in the Color Quality Club was a strategic objective for our company – one that we have achieved.”

Their presses are from the late 1970s, but the team of Prensa Libre has succeeded in joining the Color Quality Club. This proves that state-of-the-art technology is not a precondition to be successful: it is as important to dominate the process.

“We have a very committed team,” says Erick Morales, Production Manager at Prensa Libre in Guatemala, who, however, had to convince his people that “the quality

required by the needs of the 21st-century market” could also be produced with older equipment – the presses are from 1978.

## Building up knowledge is essential

Muharrem Yaşar of Feza Gezetecilik says it is important to build up an in-house pool of consolidated knowledge concerning colour printing quality and to establish a quality system. His company did not succeed in becoming a club member on the first try. Success came only after intensive examination of the subject matter, so that the company that produces five Zaman titles at five printing sites is now once again to be found among the club members.

Yaşar took a practical example to illustrate the difficulties that can be encountered: “Our greatest problem was to control dot gain in the mid-tones,” he says. It became apparent that not only did different densitometers supply different measured values, but also that using just one instrument to measure the same colour patch can produce different results if only the orientation of the instrument is changed (lengthwise or crosswise) when measuring.

The winners of the benchmark competition will be duly honoured at the World Publishing Expo 2014 in Amsterdam. The induction will take place during a ceremony on 15 October, while there will also be a gallery displaying the members’ newspapers within the exhibition halls.

If you are involved in Newspaper Production and Management, you should consider attending the inaugural conference of the World Printers Forum at the RAI in Amsterdam on 15 and 16 October 2014, that will give both newspaper production professionals and suppliers a place to gather and exchange ideas, create standards and develop strategies for the future of print.

Manfred Werfel

## Anandabazar Patrika

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Kolkata, India

At ABP, we believe in informing, educating and entertaining – using every possible means of communication. With eleven publications and three news channels, leaders all, we are the eyes of the people, showing them the world each day. From the oldest Bengali newspaper – Anandabazar Patrika, to the most innovative English newspaper, The Telegraph. From India’s most culturally revered magazine – Desh, to the country’s leading business magazine, Fortune.

We have, today, evolved from our traditional area of expertise, the print medium, to leadership in the exciting new medium – television ABP News, ABP Ananda and ABP Majha are India’s leading Hindi, Bengali and Marathi news channels.

Our reach extends to the internet as well. While both Anandabazar Patrika and The Telegraph have online editions, The Telegraph’s is the first to be available on WAP-enabled phones worldwide. In addition, mobile and internet properties are also a part of our bouquet.

We communicate news and information, ideas and values. All through the power of words.

>>> The Grand Rapids Press retired its aging Goss Mark II letter press in 2004 and replaced it with ManRoland Geoman 75 offset press equipment. The press consists of two single-out 2-5-5 jaw folders centered between eight four-over-four printing towers capable of printing 64 pages in full color. The printing facility, located in Walker Michigan, now serves as a regional print facility and prints the daily newspapers The Grand Rapids Press, Muskegon Chronicle, Kalamazoo Gazette, and seven weekly papers for Advance Newspapers, as well as other commercial print jobs.

On February 2, 2012 the Grand Rapids Press and the seven other Booth Newspapers were reorganized into two companies: MLive Media Group, responsible for advertising sales, reporting, and online publishing; and Advance Central Services, responsible for printing, packaging, distribution, and support rolls for MLive Media Group. With the reorganization The Grand Rapids Press still prints seven days, but only delivers to homes on Tuesday, Thursday, and Sunday.

Advance Central Services is proud to continue its commitment to print excellence with membership of The Grand Rapids Press in the International Newspaper Color Quality Club which began with the 2008-2010 competition, extended in the 2010-2012 competition, and returns to membership in 2014-2016.

# Interview with Aaron Phipps, Advance Central Services Michigan

Advance Central Services Michigan, publisher of The Grand Rapids Press, is the only U.S. member of WAN-IFRA's International Newspaper Color Quality Club for 2014-2016. In this interview, Aaron Phipps, Advance's manufacturing plant manager, discusses why his company entered the contest, the challenges it faced, and the benefits it sees from INCQC membership.

**WAN-IFRA: There are a number of good reasons to participate in this contest. What was your strongest motivation?**

**Aaron Phipps:** Improve the quality of our printed products and have confirmation from an independent organisation that we print to high quality standards.

**How did you prepare for the contest?**

We needed to improve the quality of products that have low copy counts where the press run speeds are slow. Normally newspapers print large quantities of papers very quickly and we were faced with needing to print products of 2,000 to 7,000 copies and do so with very good quality. We had to adjust the press ink and water curves at low press speeds to achieve results that would meet the ISO standards for newspaper reproduction.

**What was the biggest challenge?**

The biggest challenge was achieving ISO print quality standards that would be ac-

ceptable to submit to the INCQC in just a few thousand copies into a press run and not generate excessive waste. We learned that it is possible to have high scoring samples at 2,000 copies into the press run.

**Did you use the self-check possibility?**

Yes.

**What were your experiences?**

We used the self-check as a means to verify that our measurements and calculations were in agreement with the calculations used by WAN-IFRA. The usage of self-check is very quick, but it would be nice to be able to upload more than one set of data at a time. This is why we use our own formulas to calculate differences in densitometer readings from ISO standards.

**Every copy evaluation is followed by an individual and detailed report. Did these reports help you in your quality optimisation process?**

Absolutely. They were confirmation that

our measurements were correct and allowed us to make adjustments as necessary for any given element in the competition.

**What does it mean to your company (thinking about your employees and your customers) to be internationally recognised for belonging to the world's best in newspaper print quality?**

It provides independent organisation verification that we print well. It is validation for the staff that they are performing well and the competition provides a means to keep the quality level high. It also helps us demonstrate to our print customers that we can consistently produce a high quality product.

**Will you actively announce your success?**

Yes.

**Do you plan to participate next time?**

Yes.

# Al Nisr Publishing

Gulf News

**Category 1:** Coldset-offset printing on newsprint

**Printing site:** Dubai, United Arab Emirates

Gulf News was first launched in tabloid format in 1979 by prominent UAE businessman Abdul Wahab Galadari; its offices were located on the Airport Road, Dubai. In November 1984, three leading UAE businessmen, purchased the company and formed Al Nisr Publishing. The new owners of the paper were Obaid Humaid Al Tayer, Abdullah Al Rostamani and Juma Al Majid. With the death of Abdullah Al Rostamani in 2006, his position on the board is held by a family nominee while the other directors remain.

Under new ownership, Gulf News was relaunched on 10 December 1985 and was free to the public. From February 1986, the public was charged one Dirham (US 27 cents) a copy for the Gulf News package which comprised the broadsheet newspaper and a leisure supplement called Tabloid, which also contained classifieds.

After moving into new premises in 1986, Gulf News began to be distributed to other GCC countries: Bahrain from September 1987; Oman from April 1989; Saudi Arabia from March 1989; and Qatar from April 1989. It also became available in Pakistan from August 1988. (...) Al Nisr Publishing became a Limited Liability Company (LLC) with a share capital of Dh15 million on 26 May 1997. The daily launched a website and video news in the second part of the 2000s. (Source: Wikipedia, 19.8.2014)

Westfälische Nachrichten

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Münster, Germany

As the leading media brand in the region, the Westfälische Nachrichten keeps the people of Münster and the surrounding area abreast of all important events and news. It distributes editorial content and advertising information across print, online and mobile channels.

Its core activity is the newspaper, which has a daily sold circulation of about 220 000 copies in collaboration with the Münsterland Newspaper Group (ZGM). Digital offerings, such as its [www.wn.de](http://www.wn.de) news portal and WN e-paper, as well as mobile services and targeted online activities form a trend-setting addition to its Aschendorff Digital product range.

The Westfälische Nachrichten is published by the Aschendorff group in Münster ([www.aschendorff.de](http://www.aschendorff.de)), a privately owned family business that goes back more than 290 years. For nine generations, the company has been passionately, competently and responsibly publishing books and magazines, producing a wide variety of print products and satisfying the most exacting customer requirements. In addition to its book and newspaper publishing activities, the firm's product portfolio includes a strong service branch, a free paper, several advertising papers, its own internet service provider and participation in a local radio station. Aschendorff currently employs 700 people at various locations in the region. It is headquartered at the media house in the "An der Hansalinie" industrial park in Münster.

The Aschendorff printing centre, which consummated 250 years of experience and history in 2012, produces not only the Westfälische Nachrichten, but also the titles of the seven partner publishing houses in the Münsterland Newspaper Group (ZGM) as well as numerous customer jobs. Quality is always its top priority. For the sixth time in a row, Aschendorff has qualified for the International Newspaper Colour Quality Club and is thus also a member of the WAN-IFRA Star Club. QUIZ and ISO certifications provide further evidence of Aschendorff's outstanding print quality.

ZGM's distribution area extends from the German-Dutch border in the west to the Federal State of Lower Saxony in the north and from East Westphalia to the northern part of the Ruhr region in the south. Its regional orientation can be seen in its 26 total local editions.

>>> The Aschendorff newspaper tradition began in 1763 with the publication of the Münsterisches Intelligenzblatt and continued in 1852 with the founding of the Münsterischer Anzeiger, which eventually became the Westfälische Nachrichten. The history of Aschendorff book publishing goes back even further to 1720. Since then, the company has made a name for itself particularly in the fields of theology, the humanities and regional literature. Children's books and detective sorties further enrich its diverse range of around 120 new books annually. Aschendorff is also strong in the marketing of economic and consumer magazines, with numerous regional and national publications relying on the expertise of this Münster-based group.

The prepress operation at the Aschendorff printing centre is based on a digital PDF/X workflow. A PPI ProofStation soft proofing solution ensures colour matching at the console. Three Krause LS Jet (violet diode laser) platesetters ensure the daily printing plate requirement. In 2001, the printing centre was equipped with a new Wifag press and a Ferag mailroom solution. The Wifag OF 470 GTD PCU+ consists of three shaftless drive printing lines, each equipped with two four-high towers for 16 pages each in Rhenish format (max. 64 staplable pages on each of the three folding units). Ferag initially installed three mailroom lines that include, among other features, DiscPool, MultiSert drum system with up to eight inserting possibilities, ink-jet addressing, packing lines with bundle production and an online top-sheet printer. A state-of-the-art fourth Ferag mailroom line was added in 2009 as part of an expansion of the printing centre to improve processing capacities.

# British Industries Printing & Packaging Co.

Al Jarida

**Category 1:** Coldset-offset printing on newsprint

**Printing site:** South Subhan, Kuwait

The web division is stand-alone production facility, independent of any publication house, ideal for publishers who wish to outsource their newspaper printing.

The plant consists of Cromoman web offset machine, 13 towers, 2 parallel lines, heat set and cold set, having a configuration to manage any print combination at high speed. It has a fully automated Muller Martini mailroom including 2 NewsGrip conveyor lines in line with delivery stations, 1 ProLiner newspaper inserting system /PTH (press to hopper) system, 1 Preciso rotary trimmer line, 2 NewsStack and 1 Listo compensating stacker line, 2 Bundle building lines; all housed in a state-of-art building.

Web offset printing operations were started in June 2013, Aljarida being the first newspaper to roll out of our press.

Aljarida newspaper, established in June 2007, re-defined independent journalism in Kuwait through its bold editorial policy in local, regional and international news. It pioneered the newspaper scene in Kuwait by providing a true "form vs. function" relationship, giving Aljarida an unprecedented edge. The newspaper positioned itself as a leader in the market, delivering news that matters to citizens and expats in Kuwait. Aljarida boasts a distinct modern full color layout that bears high production quality.

British Industries, established as a partnership in 1993, later incorporated as a fully Kuwaiti owned share holders' company in 2005, is a subsidiary of Tamdeen Group. From humble beginnings we have grown to be important regional leaders.

Activities include sheet fed offset and digital printing, soft boxes manufacturing, book making and specialty finishing. Attention to detail, prompt service, operational flexibility and sustained quality of products to the satisfaction of the customer are traditions at British Industries.

# 'Print will remain strong in Asia'

**Keith Kam, chief operating officer of Ming Pao Enterprise Corp., publisher of the Ming Pao daily, recently offered us some insight into the newspaper scene in Hong Kong specifically and Asia in general. Ming Pao claims**

**to circulate about 130,000 copies in Hong Kong and has two editions in Canada as well.**

**WAN-IFRA: Free newspapers are emerging rapidly in Hong Kong. Is that a short-term trend, or do you believe the free newspaper model will prove a durable one in Hong Kong? Why or why not?**

**Keith Kam:** In my view, the free newspaper model will be a durable one in Hong Kong. The success of the model here has at least two main causes:

- Hong Kong is a densely populated metropolitan area, with very effective mass transit systems (subway, bus). Every morning, the majority of working adults, including the middle class or even executives, use the mass transit systems to go to work in a few CBDs (Central Business Districts). This norm facilitates the distribution of free papers.
- Hong Kong has fewer racial or cultural differentiations than many other urban areas; more than 95 per cent of the population are Chinese. We share a language, have the same or similar cultures and a similar perspective on so-

cial issues.

Aside from the boom in free newspapers, describe the most significant trends on the Hong Kong newspaper market at the moment. The most significant trend in the market is print-digital integration. Hong Kong has one of the highest penetrations anywhere of smartphones and 3G networks. Though different newspaper players have different strategies and investments in digital platforms, it is clear that players have parallel operations on both print and digital platforms to serve both the readers and advertisers.

**Switching to the Asian market in general for a moment: For how long do you think the market for printed newspapers will continue to grow in the region? Are there any early signs of the kind of consolidation that has occurred in North America and Europe?**

Printed newspapers will continue to grow in emerging or developing countries in Asia. Because of the continuous

growth of GDP (gross domestic product), the growing advertising market can support the media, so printed newspapers are still very energetic. As I said, print and digital

integration has happened, but as long as the lifestyle and habits are different from North America and Europe, traditional media will remain strong here.

# Brune-Mettcker Druck- und Verlags- GmbH

Wilhelmshavener Zeitung

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Wilhelmshaven, Germany

Newspaper founded in 1874. Company founded in 1907.

Number of employees: 150. Main title is Wilhelmshavener Zeitung.

Subtitles are Wilhelmshavener Tageblatt – Rundschau für Wilhelmshaven and Friesland - Wilhelmshavener Presse. We are an independent, non-affiliated local newspaper in the area of Wilhelmshaven and nearby communities in Friesland.

Printing is done in Wilhelmshaven. Print run: 21 899 (IV/2013), frequency of publication: 6 x weekly. Page count: Monday to Friday: between 24 and 32; Saturday: between 64 and 72. Colour: mostly four-colour content.

We are a medium-sized publishing company that, besides “Wilhelmshavener Zeitung”, publishes two additional daily newspapers in the “Wilhelmshavener newspaper group”. “Emdener Zeitung” is also printed in Wilhelmshaven. Total print run is 56 759 copies. In addition to the daily newspapers, three weekly titles are published that appear either mid-week or at the weekend, with a total print run of about 206,000 copies. In addition, on two Koenig & Bauer rotary presses (KBA Express 60, installed 1986, and KBA Commander, installed 2002, equipped with 10-cylinder satellite technology), a number of regular contract jobs are printed for customers who are active nationwide. The company covers the entire range of prepress tasks as well as lithographic jobs in the reproduction area for double-side printing (panorama pages), which the company also does. All types of printed matter are produced, from business cards to brochures, up to and including high-quality scientific books.

- Printing plant: In 2002, commissioning of a new Koenig & Bauer Commander.
- Press: two full satellites; 32 pages, 4/4; 48 pages, 4/2 with colour pre-setting.

# C.A. El Comercio

El Comercio

Category 1:	Coldset-offset printing on newsprint
Printing site:	Quito, Ecuador

Diario El Comercio was founded by Cesar and Carlos Mantilla Jácome in 1906 as a family-owned business and produced initially in a print run of 500 copies. In the course of its 108 years in existence, the newspaper has acquired a reputation for innovation, independence, objectivity, and quality.

The main strength of Diario El Comercio is its credibility. The reputation it has gained within Ecuadorian society has it to become the leading media company in the market and benchmark of journalistic responsibility, not only nationally, but also internationally.

Advertisers find in Diario El Comercio the ideal medium to promote their products. The newspaper has also earned a reputation for strongly defending the right to freedom of expression.

The quality of our products has brought us membership in the GDA (Grupos de Diarios de América, or Latin American Daily newspaper Group), as the only Ecuadorean member. Diario El Comercio works with the firm purpose of presenting contents daily that help build and educate Ecuadorian society.

Diario El Comercio is a product of Grupo El Comercio that also publishes its digital version ([www.elcomercio.com](http://www.elcomercio.com)), a series of communication products, such as specialized magazines, Últimas Noticias (latest news), Radio Quito and Radio Platinum as well as versions of Diario El Comercio for the iPad.

Since 2011, Grupo El Comercio had been working with one of its most ambitious project. The DIM (Desarrollo e Integración Multimedia, or Development and Multimedia Integration) is intended to allow the company to move towards a future of rapid and continuous technological advances and offer its products on the various platforms used at present by its audiences.

# Casa Editorial El Tiempo S.A.

El Tiempo Bogotá

**Category 1:** Coldset-offset printing on newsprint

**Printing site:** El Tiempo Colombia, Colombia

El Tiempo Casa Editorial comprises a wide portfolio of companies, of which El Tiempo is one. El Tiempo is the daily newspaper with the largest circulation and coverage in the country, with an average of 250 000 copies daily; three regional journals with a two-day-per-week circulation; Portafolio, the leading business daily paper in the country; City TV, a local TV channel in Bogotá; Multirevistas, a publishing company for niche-oriented magazines; Eltiempo.com, the most visited media website in Colombia, as well as other activities related to commercial printing, private TV and databases.

El Tiempo has national coverage and is the journal with the largest circulation with six regional editions: Nacional, Medellín, Cali, Café, Caribe and Bogotá, which are printed at three different plants.

The main plant is in Bogotá where three Goss Metro and MetroLiner presses and one 4-tower NewsLiner press with a keyless inking system are installed. The second printing plant is in Cali, in the province of Valle del Cauca, where there is a 4-tower Goss Universal 70 rotary press specialized in the printing of the highest quality coldset printing jobs. The third plant is in the city of Barranquilla, and has a 16-unit Goss Urbanite rotary press and the 4th press is located in Medellín and has a 16-unit Goss Urbanite rotary press.

For printing from Monday through Saturday, the newspaper publishes an average of 54 pages and the circulation is 235 000 copies. The Sunday edition, on the other hand, has 94 pages and a circulation of 400 000 copies. Weekday colour content is an average of 24 pages and 40 pages for weekends.

# Comunican S.A.

El Espectador

## Category 2:

Heatset-offset printing or UV-cured offset printing on newsprint

## Printing site:

Bogotá, Colombia

El Espectador (meaning The Spectator) is a newspaper with national circulation within Colombia, founded by Fidel Cano Gutiérrez on 22 March 1887 in Medellín and published since 1915 in Bogotá. It changed from a daily to a weekly edition in 2001, following a financial crisis, and became a daily again on 11 May 2008, a comeback which had been long rumoured, in tabloid format (...). From 1997 to 2011 its main shareholder was Julio Mario Santo Domingo.

It is the oldest newspaper in Colombia. Since its first issue its motto has been "El Espectador will work for the good of the country with liberal criteria and for the good of the liberal principles with patriotic criteria". It was initially published twice a week, 500 issues each. It defined itself as a "political, literary, news and industrial newspaper". Years later it became a daily and in 2001 became a weekly. Since then, the paper uses the slogan "El Espectador. Opinion is news", implying it now focuses in opinion articles, not in breaking news. This focus was kept when it regained its daily format on 11 May 2008.

According to the latest Estudio General de Medios (EGM – Segunda Ola 2007, II-2007), El Espectador has 687 900 readers every week. It is a member of the Inter American Press Association and the Asociación de Diarios Colombianos (ANDIARIOS).

DELO

**Category 1:** Coldset-offset printing on newsprint

**Printing site:** Ljubljana, Slovenia

Delo, d. d. is the largest newspaper print publishing house in Slovenia (d.d. stands for the shareholder company). Delo, d. d. covers more than 55 percent of the Slovenian newspaper market. Some 180 journalists with support from 220 technical staff publish the dominant national daily newspaper Delo (circulation 50,000-70,000 copies), the tabloid newspaper Slovenske novice (average circulation 70,000-90,000 copies) and others (Sobotna Priloga, NeDelo, Delo & Dom, Ona, Polet ...).

Delo began printing color in 1994 and became a member of the International Newspaper Color Quality Club for the first time in 1998. This happened after ISO 12647-1, 2 and 3 standards had been applied. To date, Delo has become member of the Club eight times. It is also a member of a Star Club section of INCQC.

The editorial, advertisement and prepress system is digital, supporting publishing and production of all above publications. There are more than 400 computers linked into the local area network (Mac OSX, Linux, PC/ Windows) of the DTI editorial system, plus some workstations with scanners and 2 digital printing presses from Konica Minolta. Reproduction is locally driven through Adobe applications CS6 and auto image enhancement software Claro Premedia (Elpical) in accordance with ISO specification and relative ICC-profiles. Dual document flows are created with solutions of ACCHSH (PuzzleFlow), OneVision (Asura) and RTI RIPS (Harlequin).

The configurations of both flows are designed to ensure prepress in accordance with ISO standards. Our production system comprises two thermal CTP systems (Creo Trendsetters). This equipment and thermal technology enable frequency screening.

Our production configuration is based on standardized ISO parameters using standard profiles ECI/ISO SC\_paper\_eci.icc, ISO PSO\_LWC\_Improved\_eci.icc and ISO PSO\_SNP\_Paper\_eci.icc for "heatset publications" and with ISO newspaper26v4.icc for newspaper printing.

Because of the coated and pigmented paper grades most of the supplements as well as tabloid newspaper and monthly are printed by heatset. Some of them on newsprint, another in the form of magazines on LWC or SC papers, completely in full colour with a Uniset 70 semicommercial web offset press installed in 1999. The Uniset 70 prints 6000 hours a year and its capacity is almost completely utilized through three shift operation.

However, since the first of May 2004, besides daily newspapers, supplements such as Sobotna priloga and other local newspapers are also printed by coldset on the new Colorman 4/4 web press.

Both, Mueller Martini and Ferag equipment is used for the daily delivery and mailroom tasks.

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Hamel, Germany

The Deister- und Weserzeitung (DeWeZet) has been published in Hamelin since 1848. The publishing house is owned and run in the seventh generation by the Niemeyer family, today, as a regional publishing house with a printing plant. DeWeZet has some 190 employees. Besides DEWEZET, the company also publishes Pyrmonter Nachrichten in a daily combined print run of 31,000 copies. In addition, the company supplies the editorial jacket for four other titles of partner publishing houses in the region of Schaumburg and Deister, printed in the printing center in a print run of about 33 500 copies daily. The weekly production schedule, on top of the newspaper titles, includes more than 250 000 copies of advertising free-sheets, two weekly newspapers as well as several high-quality commercial jobs.

Ad management is done by Vi@Va system from Lufthansa Systems. Layout, jacket production and page finishing are carried out in the Funkinform Dialog 4.0 editorial system. This work is done in the publishing building in the historical city center of Hamelin.

The print data transmitted via dedicated line to the printing center outside of Hamelin, built in 2004. Every night, approximately 600 plates are imaged there, printing is done on a Manroland Geoman equipped with two, four-high towers built in the blanket-to-blanket configuration. Up to 12 inserts can be processed by the inline Ferag mailroom system. In this way, every night between 23.00 h and 2.50 h about 64 500 newspaper copies are printed, wrapped and delivered to the customers.

Besides printing, the publishing house has shares also in several logistics companies and its own mail delivery service, Citipost Weserbergland. In the online issue, the Medien31 subsidiary offers online presentations and app solutions for local customers as well as Europe-wide prize games for nearly 100 newspaper publishing companies.

# Diario La Voz del Interior S. A.

La Voz del Interior

**Category 1:** Coldset-offset printing on newsprint

**Printing site:** Córdoba, Argentina

La Voz del Interior was founded on March 15th, 1904 at Cordoba, the second largest city in Argentina. In 2008 it was acquired by Grupo Clarin, the main communication media group in the country.

It is the leading regional full colour newspaper, and occupies the fifth place in circulation in Argentina, averaging 49 000 daily copies. On Sundays, average net sales are 92,000 copies and based on a readership of 2.9 readers per copy) reaches 266 800 readers.

La Voz del Interior can be defined as a multi-target newspaper, with a wide variety of contents. The main and classifieds sections are standard 50 inch broadsheet size, MundoD (sports) and VOS (entertainment, culture and leisure) in tabloid size completes the weekly editions.

Additional supplements are Trends, Tourism, Agricultural, Business, Games, Health, Humor and Reports, plus the "Rumbos" magazine on Sundays.

Since 1995 the newspaper is printed on a Goss Headliner Press, with automatic ink adjustments; in 1998 a new colour tower was added and in 2010 the incorporation of two towers Metrocolor and a folder was completed.

Dia a Dia, the second newspaper owned by La Voz del Interior is aimed at popular sectors. It has been published since 2004 and printed at the same facility.

On July 2006, after 10 years of a strong Internet presence, La Voz del Interior took the first steps towards a fully integrated multimedia company by means of a global process reengineering focused on the digital and print convergent concept, in order to be able to generate and deliver contents on multiple platforms.

The company currently has more than ten websites, such as the popular [www.lavoz.com.ar](http://www.lavoz.com.ar), [www.mundod.com.ar](http://www.mundod.com.ar), [www.vos.com.ar](http://www.vos.com.ar), [www.diaadia.com.ar](http://www.diaadia.com.ar), [autos.clasificadoslavoz.com.ar](http://autos.clasificadoslavoz.com.ar) and [inmuebles.clasificadoslavoz.com.ar](http://inmuebles.clasificadoslavoz.com.ar).

Our main site [www.lavoz.com.ar](http://www.lavoz.com.ar) ranks 3 among the most popular news sites in Argentina.

# Druck Carinthia GmbH & Co KG

Kleine Zeitung

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	St.Veit/Glan, Austria

Styria Media Group AG is one of the leading media groups in Austria. Its traditional newspaper main regions are the Austrian federal states of Styria and Carinthia. This is primarily due to the long lasting success story of the daily newspaper "Kleine Zeitung" which issues up to 120.000 copies in the Carinthia region daily.

In addition to that Styria Media Group AG issues newspapers and magazines for any other region of the Austrian market and is a major player in Slovenia and Croatia, its main foreign markets.

Druck Carinthia GmbH & Co KG with its 120 years of history is one of two Austrian newspaper printing sites within print group :STYRIA, which owns a total of three different printing plants in Austria and Croatia. Druck Carinthia's main product is "Kleine Zeitung", but they also produce lots of other newspapers like weeklies, monthlies and advertising material. Many of those are trimmed and stitched in the look and feel of "coldset magazines".

The company's technical equipment includes a MAN Roland Colorman printing machine delivering 48 pages in broadsheet format and FERAG mailroom equipment. Tip on Cards and Memostick processing machines are available in order to meet the advertising expectations of their publishers.

The printing sites of print group :STYRIA are striving to further improve their market position, thanks to a great team with stacks of ideas who provide editors with services that go beyond the mere printing process. Their aim is to make coldset products an even more successful and attractive part of the media landscape.

To be repeatedly member in the INCQC hallmarks this effort.

# Druckerei Konstanz

Konstanzer Anzeiger

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Konstanz, Germany

SÜDKURIER Medienhaus is an innovative media and service company that is leader in its region. Among its products are daily newspapers, magazines, digital media, print, communication services and logistics. High quality standards and strong local identity characterise the activities of SÜDKURIER Medienhaus. The focus of its business operations is mainly in Upper Swabia, the Lake Constance region, the Black Forest, Upper Rhine, Freiburg, up to Karlsruhe.

Established in 1945, the daily newspaper SÜDKURIER, based in Constance, is today the leading newspaper for southern Baden-Württemberg. SÜDKURIER – with its local newspaper “Alb-Bote” – is produced with 17 local editions and in the last years has won many awards, most recently the German Local Journalism Award of the Konrad Adenauer Foundation for being Germany's best regional newspaper.

SÜDKURIER Online ([www.suedkurier.de](http://www.suedkurier.de)) records the largest regional online news portal by number of page impressions in Baden-Württemberg. The Internet portals [bodenseeferien.de](http://bodenseeferien.de), [ka-news.de](http://ka-news.de), SÜDKURIER Tourenplaner ([touren.suedkurier.de](http://touren.suedkurier.de)) and Regiostars ([regiostars.suedkurier.de](http://regiostars.suedkurier.de)) complement the Medienhaus portfolio. The Medienhaus has successfully positioned itself in the growth market for mobile information and advertising with the SÜDKURIER apps for iPhone and iPad as well as offerings for mobile Internet. The mobile tourism market has been catered to also with the Lake Constance app for iPhone and Android smartPhone's.

The demand of readers and advertisers in the special interest segment is catered for by the journal “Gesundheit!” (health), city and regional magazines as well as tourist magazines for Lake Constance and the Upper Rhine region.

>>> The Medienhaus is among the pioneers in Germany for delivery of addressed and unaddressed products and advertising materials. Our distribution organisations guarantee optimal distribution quality for the regional, national and international delivery of unaddressed products and advertising material. The mail service "Arriva", established in 2000 as a joint venture, is today Baden-Württemberg's largest private mail service provider and a part of TNT Post Deutschland.

Printing of the SÜDKURIER is done by the subsidiary Druckerei Konstanz GmbH. The official ground-breaking ceremony in November 2008 marked the beginning of the company site in Constance of the construction of the new printing centre and replacement of all production installations. Full production operation started up in March 2010. Printing is done by the warlerless offset process on a KBA Cortina press, thus opening up completely new dimensions in relation to printing quality, ecology and efficiency. Finishing is done on Ferag equipment, offering a wide range of additional options for processing and upgrading the printed products. Besides the daily newspaper, a wide spectrum of high-quality own and customer objects is produced.

Druckerei Konstanz has also been awarded the "PrintStar 2011" innovation prize of the German printing industry in the category Advertising Materials.

**Nordkurier Mediengruppe, Nordost-Druck GmbH & Co. KG**  
Nordkurier Mediengruppe is the leading media company in the north eastern area of Germany. We are publishing 14 daily newspapers, weekly newspaper editions and various printed magazines, running several local television stations, offering postal services, corporate publishing, direct marketing, events and are operating a major online platform for tourism. With 81 500 sold copies our newspapers reach round about 244 000 readers in Mecklenburg-West Pomerania and Brandenburg on a daily basis. The online news portal nordkurier.de is the market leader in Mecklenburg-West Pomerania with nearly 1.2 million visits.

Our state of the art printing centre (Nordost-Druck) is located in Neubrandenburg and is providing services even for external customers, further information can be found on [www.nordost-druck.de](http://www.nordost-druck.de).

Nordkurier Mediengruppe is one of the first publishing houses worldwide participating in the QUIZ-project (April 2000) and has been establishing a standard profile to fulfill the ISO-norm 12647-3 in the early days. Using an integrated standardised colour management is a very important philosophy in our company.

Our employees' skills, performance, competencies, their motivation and inspiring identification with our products are decisive factors for our success.

Berner Zeitung

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Bern, Switzerland

Berner Zeitung (BZ) is the third-largest subscription daily newspaper in Switzerland and the leading daily newspaper for the Canton of Bern. It specialises in providing detailed reporting of regional news and sports. Berner Zeitung is published in three regional editions for the city and region of Bern, Emmental and Oberaargau and shares editorial material with the Berner Oberländer and Thuner Tagblatt newspapers. It belongs to Zurich-based Tamedia.

Berner Zeitung was published for the first time on 3 January 1799, but the newspaper has a history dating back to 1834. The origins of today's Berner Zeitung can be traced back to Das Intelligenzblatt (1834) that was renamed Berner Tagblatt in 1888, Die Emmenthaler Nachrichten (1883), Wochenblatt des Emmenthals (1844) and die Neue Berner Zeitung (1919). Berner Zeitung emerged from the merger of the Emmenthaler Blatt and Neue Berner Zeitung in 1973. It then merged with the Tages-Nachrichten (formerly Emmenthaler Nachrichten) in 1977 to form the Berner Nachrichten. The present day Berner Zeitung was born in 1979 from the merger of Berner Nachrichten and Berner Tagblatt.

At the beginning of 2001, Thuner Tagblatt and Berner Oberländer became ring papers (i.e. reprints with change of title only) of the Berner Zeitung. That same autumn an additional regional edition, Solothurner Tagblatt; was launched. However, this was shut down in 2009 for economic reasons. Since 2001, Berner Zeitung has supplied the national news pages for the Freiburger Nachrichten.

In December 2011 Espace Media announced its intention to merge the Oberaargau split edition and Langenthaler Tagblatt, which it had taken over from AZ Medien AG. The first edition of BZ Langenthaler Tagblatt was published on 2 July 2012.

# E. Holterdorf GmbH & Co. KG

Die Glocke

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Oelde, Germany

Die Glocke, a regional paper published by E. Holterdorf GmbH & Co. KG in the town of Oelde, Westphalia is one of the leading media brands in the Gütersloh and Warendorf districts. Founded in 1880, Fried Gehring and Dirk Holterdorf are responsible as shareholders with personal liability for managing the business.

With six local editions, Die Glocke has a sold circulation of around 57 000 copies in the Gütersloh, Warendorf and Soest districts. Advertisers have the choice of 13 different advertising formats for the newspaper, the Wersekurier free-sheet and its free weekend magazine Echo am Samstag. The subscriber share is 95%.

The publishing house also operates a regional Internet news portal, [www.die-glocke.de](http://www.die-glocke.de), which offers news from the newspaper's distribution area as well as tips and registration for its e-paper, a verbatim reproduction of the printed edition of Die Glocke. Digital news is available on mobile devices at [mobil.die-glocke.de](http://mobil.die-glocke.de). The firm has also expanded its digital family with an app for iOS and Android tablets.

The publishing company holds a majority share of Radio WAF (Warendorf district) and Radio Gütersloh (Gütersloh district), local radio stations that broadcast in Die Glocke's main distribution area.

At the main office in Oelde, the editorial department is organized into news desks and supplies readers with news on politics, business, culture, Westphalia, sports and tips as well as international news. In the publishing building, renovated in 2010, the Glocke am Sonntag newsroom produces its eight-page weekly magazine. Die Glocke has six local editions: Gütersloh, Rheda-Wiedenbrück, Warendorf, Ahlen, Beckum and Oelde. It employs 65 editors and 5 volunteers.

Die Glocke is produced in four colours on all pages on a KBA Colora press six days each week in the company's own printing centre. Each edition is planned on the alfa OpenMedia editorial system. The planning data is used both in the plate workflow as well as for control of the press. In this way, the plates are automatically sorted according to their position after exposure, the press ink keys are pre-set and the soft proof is produced for the printer.

# Edizioni Brescia S.p.A.

Bresciaoggi, Centro Stampa S.E.A., Caselle di Sommacampagna

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Verona, Italy

Established in 1974, Bresciaoggi is published by Edizioni Brescia S.p.A., a company owned by Athesis Publishing Group. With a daily circulation of 17 000 copies Bresciaoggi is the second newspaper in his town (Brescia).

Athesis Publishing Group (2013 consolidated turnover € 77 526 000, 360 employees) publishes and prints also L'Arena (50 000 copies daily) and Il Giornale di Vicenza (45 000 copies daily).

Athesis holds three local TV (TeleArena, BresciaPuntoTV and TeleMantova) and also, since 2000, a radio station (Radio Verona) and a small books publishing house (Neri Pozza, Vicenza).

Advertising on owned media is directly managed by PubliAdige S.r.l., a 100% Athesis controlled company.

Bresciaoggi started the publications on April 1974. For several years the company was owned by a cooperative company composed by journalist and other employees. In 1990 Athesis took the control of the newspaper.

Bresciaoggi is published seven days a week in a single edition and it's distributed in Brescia and in the surrounding area, that means a country with a population of around 1 260 000 inhabitants (194 000 of them in town). Strongly related to the country, Bresciaoggi is a comprehensive and up-to-date local newspaper that has not only a wide coverage of the local news but also a complete overview of the national and international topics on which also important Italian free-lance reporters give their contribute.

In July 2007 the newspaper changed to a new format (350 x 500 mm), completely renewed its graphic layout and increased the number of page to maximum 96 full colour.

Top technology is used in the pre-press process: a Atex Hermes 10AX system and an Agfa Arkitex: output pages to CTP (Agfa Polaris XTV with low chemistry photopolymer plates Fuji Brillia PRO-V).

In 2007 Athesis Publishing Group moved the production of its newspapers in a totally new and modern printing plant owned by a controlled company.

In the press room two Man Colorman rotary presses were installed (double width, double circumference, 96 tabloid pages full colour in collect production, 35 000 copies per hour).

In the last quarter of 2009 the two rotary presses have been modified to reduce the web width from 200 cm to 180 cm; the more compact size (350 x 450 mm) fulfils better the requirements of the market.

# El Telégrafo

Diario el Telégrafo

**Category 1:** Coldset-offset printing on newsprint

**Printing site:** Guayaquil, Ecuador

The daily newspaper El Telégrafo took its name in honour of the telegraph service that was introduced into Ecuador in 1884 and that established the country's effective communication with the world. Moreover, El Telégrafo was the first Ecuadorean newspaper to use this invention.

The newspaper was immediately well received by the public. Its radical and liberal discourse allowed El Telégrafo to act as a guide during the Liberal Revolution. On 1 January 1885, Colonel Nicolás Infante, leader of the revolutionaries, was shot. El Telégrafo published protests against this crime, signed by citizens, in several editions.

In 1898, all shares in El Telégrafo were acquired by José Abel Castillo. After this, the newspaper became the main morning newspaper in Ecuador for several decades.

On 15 November 1922, under the liberal government of Luis Tamayo, hundreds of workers were killed in the streets of Guayaquil. El Telégrafo was the only newspaper in the country to protest and fill its pages with complaints against the regime.

In 1923 the present-day El Telégrafo building, located in the avenues Diez de Agosto and Boyacá, was opened. In that same year the first Albert press in the country was installed. But it was not until 1926 that the newspaper was printed in the gigantic printing plant. José Abel Castillo returned to the country in 1927 and took over the management of the newspaper, always with the assistance of his children. In 1940, Santiago Castillo y Castillo took over the leadership of El Telégrafo.

With the new administration, El Telégrafo became the first newspaper to use the services of foreign news agencies as well as the first to publish aerial photos of the country. El Telégrafo has provided a platform for the country's best journalists and writers, such as Manuel J. Calle, Medardo Ángel Silva, José H. Simmonds, Juan Emilio Murillo.

El Comercio

**Category 1:** Coldset-offset printing on newsprint

**Printing site:** Lima, Peru

Group El Comercio is a group of business units, one of which is El Comercio.

El Comercio is the country's oldest and highest-profile newspaper, with an average circulation of 100,000 copies from Monday to Friday, 180,000 copies on Saturday and 220,000 copies on Sunday.

The newspaper has a different structure according to the day of publication, e.g. News, Economy, Sports, My Home, Travel, My Business, The Sunday, Portfolio, Day-1, International, Jobs, etc.

Besides El Comercio, the El Comercio group also publishes the following national titles: Trome, Perú.21, Depor, Gestión y Publimetro, produced at three printing plants in Lima, Chiclayo and Arequipa.

Two plants are located in Lima, one for commercial printing and the other for newspaper printing, which is done on four presses, two Goss NewsLiner presses with a capacity of 64 and 32 pages respectively, one Tensor press equipped with four printing towers offering a capacity of 32 tabloid pages and one manroland Lithomatic II press with a capacity of 32 tabloid pages.

There are two presses installed at the Chiclayo plant, one Goss Community with a capacity of 32 tabloid pages and one Goss Mercury with a capacity of 16 tabloid pages for printing the regional edition of El Comercio for the northern part of the country as well as the tabloid products distributed there.

There is one press installed at the Huancayo plant, one Goss Community with a capacity of 32 tabloid pages for printing the regional edition of El Comercio for the center part of the country as well as the tabloid products distributed there.

In Arequipa a nine-unit Harris V25 press is used to print the tabloid products distributed in the southern part of the country.

El comercio.pe is the media website with the highest visitor traffic in Peru.

# Empresa El Mercurio S.A.P.

El Mercurio

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Santiago, Chile

El Mercurio is a Chilean newspaper with editions in Valparaíso and Santiago. Its Santiago edition is considered the country's paper-of-record and its Valparaíso edition is the oldest daily in the Spanish language currently in circulation. El Mercurio is owned by El Mercurio S.A.P. (Sociedad Anónima Periodística, "joint stock news company"), which operates a network of 19 regional dailies and 32 radio stations across the country.

The Valparaíso edition of El Mercurio was founded by Pedro Félix Vicuña (Benjamín Vicuña Mackenna's father) on September 12, 1827, and was later acquired by Agustín Edwards Ross in 1880. The Santiago edition was founded by Agustín Edwards Mac Clure, son of Edwards Ross, on June 1, 1900. In 1942 Edwards Mac Clure died and his son Agustín Edwards Budge took over as president. When Edwards Budge died in 1956, his son, Agustín Edwards Eastman, took control of the company.

# QUIZ: New developments for print

**QUIZ stands for quality and innovation in newspaper printing. The event, held jointly by WAN-IFRA and ZMG (the German newspaper marketing association), took place December 2013 at the Druckzentrum Rhein Main printing centre in Rüsselsheim, Germany.**

A new type of screening technology, the world's first wet softproofing solution, and a paper testing instrument were just some of the interesting innovations presented during the two conference days.

Other topics included these:

- **Quality monitoring** of six printing plants working with different equipment to print one product, the *coop-Zeitung*. With a total print run of 2.5 million copies split into 16 editions, this is no simple undertaking! It is the task facing Hansjürg Stihl, head of Druckzentrum Winkeln near St. Gallen, Switzerland, which has set the standard for printing quality for all plants since October 2010. For purposes of quality control, three printed copies per issue are manually measured. The data are input into a system where they become available immediately for use in a wide range of comparisons and statistics. This is done using the iQIP system solution from Impakt-medien, which supports the evaluation and statistical data processing. Stihl praised the simple graphic display of the results, in the form of bars and pie-chart diagrams that enable the viewer to see at a glance how the printing quality of an individual printing plant, as well as all printing plants in comparison, evolves.
- The topic of **energy efficiency** is becoming increasingly important for the printing industry, especially because the implementation of an energy manage-

ment system will be required by German law starting in 2015. Max Ondrusch, an expert in this area at Fogra (a German printing research association), explained how over and above the requirements – such as retrofitting installations and buildings or the inspection of air-conditioning for energy efficiency – a printing operation can increase its energy efficiency by voluntary measures, i.e. increasing the efficiency of existing processes or cutting energy consumption by investing in installations with lower power consumption. Moreover, costs can be reduced indirectly by taking advantage of possible grants (he cited corresponding contacts and programmes at national and EU levels). It is also advantageous to acquire the appropriate competencies within the operation.

- Project leader Eva Fauth (Verlagsgruppe Rhein Main) reported about “Kruschel,” the first German **subscription newspaper for children**. A wide variety of topics is covered: news stories that interest adults, as well as topics of particular interest to children. Nor does the newspaper shy away from tackling controversial subjects (e.g. AIDS) and presenting them in a way suitable for children. Texts are brief and the layout both lively and colourful. “Since the Pisa Study [of pupils’ achievement levels in the EU], parents have become very concerned that their children should read something of value, and they are willing to pay for it,”

said Fauth. One element of the concept is the “Kruschel Monster” who pops up regularly in the newspaper, sometimes also appearing in person as a “walking act” to pay a visit to a school class – or the QUIZ participants!

- “The success of a **benchmarking** project depends largely on the comparability of the data and the will to carry out the project,” said Moritz Schwarz, Consulting Manager at WAN-IFRA. He presented a proposal to the QUIZ participants to launch a benchmarking project for newspaper production, in order to obtain a first impression of whether there is interest in the industry for such an offer. The first step would be to list and select individually the key performance indicators (KPI) to be used for purposes of measurement and comparison. The input of data into the WAN-IFRA database and evaluation would be realised via a web portal – anonymously, so that only the data and not the identities of the participating operations would be recognisable. WAN-IFRA sees itself as a suitable platform for a project of this type, in which case access to the database should be free of charge. Schwarz would be pleased to provide further information ([moritz.schwarz@wan-ifra.org](mailto:moritz.schwarz@wan-ifra.org)). The objective is to be able to generate first dependable comparisons from the database after one year’s time.

**Report by Senior Editor Charlotte Janischewski**

ZAMAN

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Izmir, Turkey

## ZAMAN MEDIA GROUP

Established in 1986 along with its parent company Feza publications Inc., Zaman (translated 'time') has in a short time become the most widely read and respected conservative newspaper in Turkey, with a Daily circulation of nearly 1,100,000. In 25 short years, Zaman has become a trademark with branch offices around the globe, supporting international editions in Australia, Azerbaijan, Bulgaria, Germany, Romania, Kazakhstan, Kyrgyzstan, Macedonia, Turkmenistan, and the United States. Special international editions are printed in the languages of the countries where they are published. News bureaus and representatives support the headquarters in Ashgabat, Baku, Brussels, Bucharest, Frankfurt, Jerusalem, Moscow, New York and Washington DC.

As an independent daily newspaper, Zaman is acknowledged of its serious, fair and balanced reporting. Zaman has signed off on important successes in the field of design, winning a total 103 awards in the past 10 years in a row of the world-famous Society for News Design (SND) competition.

Zaman Media is audited by BPA worldwide, which is a founding member of the International Federation Audit Bureau of Circulation (IFABC), a voluntary cooperative federation of audit companies around the globe. The audit system involves auditors reviewing and verifying circulation claims and statements made by publishers.

Zaman Media Group has 5 modern printing facilities around the country and they are located in Istanbul, Ankara, Izmir, Adana and Trabzon. Zaman is primarily sold by subscription method that it covers %95 of its total circulation. In addition the to Zaman daily, Zaman Media Group owns a leading weekly news magazine Aksiyon, a family magazine Yeni-bahar a quarterly magazine Turkish Review, a news agency Cihan, week-end and weekday supplements Cuma, Cumartesi, Pazar and an English daily newspaper Today's Zaman.

# Galadari Printing & Publishing (LLC)

Khaleej Times

**Category 1:** Coldset-offset printing on newsprint

**Printing site:** Dubai, United Arab Emirates

The Khaleej Times is a daily English language newspaper published in Dubai, United Arab Emirates. It is the second most popular English language newspapers published in the UAE.

The Galadari Brothers began publishing the daily on 16 April 1978 making it the first English daily in the UAE. The daily is published in Sharjah. The newspaper is also partially owned by the UAE government.

The broadsheet comprises the general news section, the business pages and a lively sports section. Khaleej Times is not audited and it is believed to print around 150 000 copies, making it one of the most popular English Language newspapers in the Gulf. Additionally, it covers Bahrain, Oman, Kuwait, Qatar and Saudi Arabia through a dedicated distribution network. The newspaper also consists of Special Reports and Supplements which allow for community advertisements and other services.

# Göttinger Tageblatt GmbH & Co. KG

Göttinger Tageblatt

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Göttingen, Germany

Druckhaus Göttingen is printing the daily newspaper Göttinger Tageblatt of an average circulation of 35.000 copies as well as some 2.3 million copies of weekly free-sheets for distribution in the cities of Hanover, Hildesheim and the southern part of Lower Saxony. Two Koenig & Bauer Colora presses are used to print more than 150 tonnes of ink on some 9 500 tonnes of newsprint annually.

The company also produces high-quality print objects with the help of commercial and sheet-fed printing processes. Such products include calendars with high-quality images, advertising brochures, posters and even art books and catalogues for exhibitions of fine art.

Druckhaus Göttingen offers the following services:

- Druckhaus Göttingen is specialised in printing scented inks and spot varnished products. Those special elements are exactly positioned on the relating motive areas and deliver context related effects, which can have a highly emotional impact on the readers and users of the print products.
- The print house offers consultancy services in the areas of design, material, implementation and logistics.
- It provides experience, competence, innovative technology and offers a reliable partnership.

Customers can be sure that their ideas and graphic art work are transformed perfectly into print products and advertising on paper. This is why the print house makes sure to provide the highly relevant certification of its product and process quality, "Process Standard Offset Printing" according to ISO 12647.

The company invests constantly in latest technology as well as in training of the personnel to improve its processes and printed results. For detailed information about our operation and products, visit our website [www.druckhaus-goettingen.de](http://www.druckhaus-goettingen.de).

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Heilbronn, Germany

“Connected to the region – informed worldwide” is the motto of the Heilbronner Stimme, the leading media company and regional newspaper publisher in northern Württemberg. The Heilbronner Stimme is a family-owned company and was founded in 1946 by Paul H. Distelbarth and Hermann Schwerdtfeger. Today, Tilmann Distelbarth leads the company as publisher and managing director and belongs to the third generation of Distelbarths in the company. Bernd Herzberger is also an additional managing director.

At the heart of the company is its daily newspaper and its full editorial department. It is published Monday to Saturday under the names Heilbronner Stimme, Hohenloher Zeitung and Kraichgau Stimme with a daily distributed circulation of around 90 500 copies (source: IVW 1/2004). A total of nine different editions for Heilbronn and the surrounding area and for the Hohenloher region underscore the company's local expertise. More than 275 000 readers (source: ma 2014) read the paper every day. Its well-ordered structure and design make it one of Germany's most modern and reader-friendly regional newspapers and one of the most important vehicles for advertising in the region. With its subsidiaries Delta Medien Service GmbH Heilbronn, Werbung Marketing & Verlag GmbH & Co.KG in Bretten and Verlag und Service GmbH & Co. KG in Schwäbisch Hall, the company also publishes weekly newspapers and high-quality monthly magazines. The RegioMail GmbH mail delivery service also belongs to the group's portfolio.

# Infoglobo Comunicação e Participações S.A.

O Globo

<b>Category 1:</b>	Coldset-offset printing on newsprint
<b>Printing site:</b>	Brazil

Everything began with the newspaper O Globo, which makes part of the dweller's life of Rio de Janeiro since 1925. Infoglobo, through its products – the newspapers O Globo, Extra and Expresso – has the mission to clarify the fact, offering its readers quality informations, always with the concerning to adequate the language with the intended audience. Besides clarifying what happens of more important in Brazil and in the world, Infoglobo's products are also a tool for the access of the best of entertainment and culture. The company has much proud of this mission and works with the commitment to bring serious and exempted journalism to the costumers.

In April 1998, Extra, a newspaper geared to the B and C classes, which quickly became recognized for its proximity and legitimacy came with your audience. Renowned for their promotional activities, the newspaper mobilized the locals in the contest in which readers themselves have chosen the name of the new product.

With a simple, fast and easy language, the Express newspaper hit the newsstands in March 2006 to provide readers of classes C and D the opportunity to be well informed, paying a more affordable price.

Since it began, many changes have influenced our business. Today, this scenario is no different. Instead, changes occur now with even more speed. Attentive to the needs of adaptation to the new market environment, Infoglobo has strongly prepared to consolidate the digital world, reaffirming their products as platform vehicles.

In this sense, increasingly seek to offer our readers, mobility, interactivity, information, service and relevant content on digital devices. O Globo a Mais, O Acervo O Globo, O Globo and Extra Mobi, issues in Flip and websites are some examples of successful products of our digital portfolio.

In 1999, the actual printing plant started producing. In 2012 two machines were upgraded to provide the color capacity needed to print a full color product. The printing plant has six presses, 12 folders, 48 reelstands and 32 press units, all of them equipped with automatic color register and automatic cutoff control to ensure a good adjustment during the production.

Print quality is an obsession. Infoglobo always wants to provide to its costumers not only a good content but also a well printed newspaper. O Globo is a full color product and has an average daily production of 195 thousand copies during the week and 301 thousand copies on the weekends.

# Interview with André Ferreira of Brazil's O Globo

The Brazilian publishing company Infoglobo Comunicação e Participações S.A., publishers O Globo, is among the members of the International Newspaper Color Quality Club (INCQC) for 2014–2016. In this e-mail interview, André Ferreira, the company's Process Engineering Coordinator, discusses the challenges they faced during the contest and the benefits they see from belonging to the INCQC.

**WAN-IFRA:** There are a number of good reasons to participate in this contest. What was your strongest motivation?

**Ferreira:** Have an international quality standard to compare ourselves perception of print quality.

**How did you prepare for the contest? What was the biggest challenge?**

After our fail in 2012, we did a complete action plan based on the reports we received in the 2012 evaluation. We had three big challenges: the dot gain adjustments, a fully understand of the evaluation and have an internal evaluation similar to

the IFRA's, one with the same conditions and equipments response.

**Did you use the self-check possibility? What were your experiences?**

We used it all the time. It was a very useful tool.

**Every copy evaluation is followed by an individual and detailed report. Did these reports help you in your quality optimisation process?**

This year it was not necessary, because we did a good preparation. But the report is always useful to give some directions about the opportunity for points of improvement.

**What does it mean to your company (thinking about your employees and your customers) to be internationally recognised for belonging to the world's best in newspaper print quality? And will you actively announce your success?**

To be part of the International Newspaper Color Quality Club was a strategic objective for our company and we accomplished this. It is a honour for us to be part of the INCQC. We published this in O Globo.

**Do you plan to participate next time?**

Yes, of course. The next target is to be a Star Club member.
